

**Thankyou for your
participation at our
Java Card Forum
Open Day**

**Neda Behnam
Renesas Technology**

www.javacardforum.org

Summary

- ? JCF Promotes Java™ as the preferred programming language for multiple-application smart cards
- ? The group is currently working on enhancements to the 2.2 Java Card™ API and in parallel, the Next Generation Java Card specification requirements (3.0)
- ? Next Generation Specification Release planned Spring 2008
- ? Next Generation Specification update, tools and test suites planned Fall 2008
- ? Next Generation benefits:
 - Multi-tasking
 - Web based user interaction
 - Scalable security
 - Internet network connectivity
 - Greater community access
 - Backward compatibility

Activities this Year

? 1st Open Day in Japan

- Sharing current success stories
- Providing scenarios for upcoming technology (Next Generation)
- Opening channels with key players in the Japanese market
- How can we continue to develop this relationship?

? 10 year Anniversary

- JCF celebrates 10 years in 2007
- Celebrations will take place at CARTES show in France in November, to honour original members and stimulate interest in future technology

? CARTES show (Europe)

- Half day conference track dedicated to Java Card technology
- JCF 10 year celebrations
- Member companies showing solutions running on Java Card technology

How to Become Involved

- ? Develop your Next Generation Java Card
 - For Card or OS makers
 - Become JCF members

- ? Develop your applets on Next Generation Java Card
 - SUN can provide a toolkit

- ? Send your inputs to the Java Card Forum
